

## AC Utility Truck

Our compact, tough burden carriers can be used in any industry. The Johnson Industries burden carrier trucks can be modified or redesigned to meet most any customer demand. The AC Utility Truck is built for sustained runtime and pulling power.

With features like 550 amp AC controller, 7" rear drum brakes, and a 2,500 pound payload capacity, the AC Utility Truck is a great benefit in a variety of industries. Johnson Industries' AC Utility Truck is a great supply and personnel carrier and can be used around the world in mining, airports, factories, warehouses, construction, hospitals, or municipalities.

Featuring a 25 amp programmable charger, panic switch, and a sealed 500 amp solenoid, the AC Utility Truck from Johnson Industries is a great solution for your industry's personnel and supply carrier needs
